

**FROMM** | AIRPAD  
SYSTEMS

## AP100

### Compact airpad system

- Suitable for every work station
- Heavy duty design for continuous operation
- Modular setup for enhanced productivity

## AIRPAD AP100

FROMM's compact airpad device for all protective packaging needs

### Suitable for every work station

- Small footprint for easy integration
- Stand-alone or multiple operator configurations
- Ideal for decentralized packaging stations

### Designed for optimum ergonomics

- Fast learning and user-friendly operation
- Simple control panel
- Silent hopper operation
- Quick and easy film loading

### Modular setup for enhanced productivity

- Overhead hoppers and on-floor storage bins
- Automatic replenishment
- Foot switch operation
- Manual pad holder for easy dispensing

### FROMM technology

- Heavy duty design for continuous operation
- Efficient technical support
- End-of-the-line expertise

# AIRPAD AP100

FROMM's compact airpad device for all protective packaging needs

## Technical specification

- Power supply: 90-240V-50/60Hz
- Weight: 11,4 kg (without options)
- Speed: 12m/min
- Film quality: PE
- Film width: 200 mm, 400 mm

## Consumables

Pad sizes:

## Options

Mobile on-floor storage bin with integrated mounting base

code 50.2111

Foot pedal

code AP1.1216

Manual pad holder 200 mm  
Manual pad holder 400 mm

200 mm : code 50.2113  
400 mm : code 50.2114

Electric overhead dispensing system

code 50.2118

Manual overhead dispensing system

code 50.2117

## FROMM Group

Left to right: Development centre in Germany, Production centre for machines and equipment in Italy, Production centre for STARstrap™ strapping in Thailand, Productions centre for STARstrap™ strapping in Germany, Productions centre for STARstrap™ strapping in Chile, Polyester recycling plant in Germany

The FROMM Group develops and produces a wide variety of systems for unitizing and palletizing goods for transport: strapping machines and systems, pallet stretch wrapping machines, the patented Airpad pillow system, together with all necessary consumables.

Established in 1947, the Swiss family business generates a turnover in excess of 200 million Euros and employs a workforce of around 900 world-wide. Over 35 subsidiaries in Europe, North and South America, South Africa, Asia and Australia along with a multitude of specialized sales partners throughout the world ensure – in your vicinity – professional advice, prompt customer service and maintenance. The company pursues a policy of logical vertical integration while upholding traditional values such as proximity to customers, quality consciousness, continuity, independence and environmental awareness, which are the reasons for decades of success.

### Development centre

In the FROMM development centre, a long established and experienced team of engineers constantly develops new techniques and products using the very latest 3D CAD systems. Up-to-date test procedures guarantee the high FROMM quality standards.

### Production centres for machines and equipment

Production takes place round the clock in the FROMM production centres. Highly qualified teams of specialists manufacture FROMM products satisfying the highest demands of quality on computer-controlled machines. All machines are tested before leaving the factory. The company has ISO 9001 certification.

### Production centres for polyester plastic strapping and multilayer blown films

STARstrap™ plastic strappings are produced in the FROMM production centres exclusively from recycled polyester bottle material on modern state-of-the-art extrusion plant. These bands guarantee the high quality of the strapping carried out with FROMM machines and equipment.

All kinds of film types for the Airpad pillow material are produced on blown film extrusion machines. Special film types guarantee a high loading capacity of the individual pillow elements. The plants are certified in accordance with ISO 9001 and ISO 14000.

### Polyester recycling plant

Produced in the FROMM recycling plant from used PET bottles is high grade ground material, agglomerates and regranulates for the production of PET strapping, foodstuff films, textiles and drink bottles. This enables FROMM PET products to satisfy the most rigorous ecological requirements. The plant is certified in accordance with ISO 9001 and ISO 14000.

**FROMM stands for development, production, consultancy, sales, service – worldwide and from a single supplier!**
